Hi Val,

We appreciate the invitation to discuss Portland Harbor with your class. We hope that it was helpful for the students. Sheryl Stohs is the EPA contact for EJ screen if you have further questions on access.

Thank you.

Alanna and Annie

Hi Alanna,

Thank you very much for coming to talk with our class yesterday - please pass my thanks along to Annie as well. I hope that my students and I make it to some of your community outreach meetings as well.

Val

Hi Alanna,

I'll request a second pass for Annie to be sent to your email. We are in Building 7, Rm. 106 at 1 pm today.

Thank you!

Val

Also – what building and room will the class be held?

Thank you.

Hi Alanna,

We are looking forward to your visit tomorrow. I just sent you a parking pass, if Annie needs one too just send me her an email and I'll request one for her too. If you need to reach me to tomorrow, you can call my cell phone at (b) (6)

Thank you,

Va

Hello Val,

This information is helpful. Both Annie Christopher and I will give the presentation. Annie is a remedial project manager and I am the community involvement coordinator. We will keep the discussion within the 40 minute time limit for Feb 29<sup>th</sup> and cover the topics outlined below and in attached form.

No questions for now. We look forward to joining the class and appreciate your invitation to talk with students.

Talk with you soon,

Alanna Conley

**Subject:** Visit to PCC

Hi Alanna,

I hope that your new year is off to a good start! I'm emailing to provide more information about the environmental studies orientation class that you will be coming to speak to on February 9th.

This is a one unit course in which students who are planning to major in environmental studies or environmental science learn about the programs at PCC and PSU, and become familiar with a variety of environmental organizations and career options. I have several guest speakers come speak about their organizations, their particular job, and the educational and career pathway that has led them to their current position. The class is from 1 - 1:50 pm so I recommend preparing for a 40 minute talk (we have a computer

and projector if you'd like to use a presentation or access website during your talk) and allow 10 minutes for questions.

I've attached the syllabus and the in-class assignment students will be asked to complete for your presentation. If you'd like to talk more over the phone, please give me a call on my cell phone at (b) (6) . I will be sending you a parking pass as the date approaches, along with directions to the classroom.

Thank you so much for taking the time to come talk with my students. I'm excited to hear the perspective from an EPA staff-person working on local issues.

Val
